"Sure I wave the American flag. Do you know a better flag to wave? Sure I love my country with all her faults. I'm not ashamed of that, never have been, never will be."

-John Wayne

President's Message

My closet is full of hats, Even the dash of my truck as a couple of hats. A Hamfest hat, a NPOTA hat, 2016 Field day hat, and a trout fishing hat. How many hats do you wear? Or are you wearing enough hats? Is it time to take off some old hats, and put on a new one? Grandpa hat, husband hat, worker hat, Dad hat, Amateur radio club hat. Doesn't matter how much hair you have, or if you're bald like me, you can always change hats. Hats say a lot. Some hat colors show you support for your favorite sports team, some show your occupation like police or fire rescue, some hats protect you from too much sun, some protect you from falling objects, but all hats make a statement. Hats say your club name, your call sign, some even show the truck or tractor you like. The Alford Memorial Radio Club has lots of hats for you to wear. You have a choice of hats, Elmer, Club Officer, helper, and volunteer. These kinds of hats are free and come in all sizes. AMRC has hats for men, women, boys and girls. When you put one on, others look at you and your hat. AMRC hats can change the person under them. They can increase self-esteem and even inspire you to help others. In my opinion you can never have too many hats, but remember you can only wear one hat at a time.

May storms, wind, and rain have tested all our antennas, and the month is just getting started, so tighten your lines recheck your connections and get on the air.

There are many local VHF nets in the Atlanta area and I've recently started getting into HF nets. Some are formal and others informal. But all are fun ways to make sure your staying up to date on current ham radio events or discussing radio related issues challenging you and your friends. We'll be posting a list of many of the area nets in upcoming issues of the TOTR.

May 11th, Jim Reed, N4BFR, (President of the Atlanta Radio Club) will present our May program by sharing his experiences with the with Raspberry Pi. I saw Jim's program at the GARS meeting and was inspired to get a Raspberry Pi. Looking forward to getting it integrated into in my shack. I'm looking forward to hearing Jim present this coming Thursday evening at AMRC meeting.

May 13 th Turnip Truck Workshop, AMRC members, Turnips and friends will meet at the Annistown Baptist Church to work on projects. One of these will be building a "poor man's power gate" type connector, which can provide switching power supply from for ac power to battery backup. Zargon WB2PSB has been working on several models to build. At the workshop, learn proper Anderson Power pole applications in the

process and upgrade your soldering skills. Elmers will be present to assist. A small donation will cover cost of parts. You will also want to bring your HT, it's programming cable, software, laptop, and we will help you program it with many of our area repeaters using CHIRP. Of course we will eat, pizza and dessert will be provided.

Save the Date: Color Vibe 5K Run, May 20th Stone Mountain, click [here](#) for more race info. The Color Vibe 5K Run is a fun, quick event where our club members provide communication for the smooth operation of the run, safety for the runners, as well as coronation for the traffic congestion within the city of Stone Mountain. It's a wonderful chance for you to use your HT and communication skills and public relations skills to promote the hobby and our club.

Save the Date: Atlanta Hamfest June 3 rd . Jim Miller Park, AMRC members will be needed to man the club table, a silent key table, and a youth radio booth.

Save the Date: Field Day June 23rd-25th, a special ARRL event it will include camping, picnics, games and fun. We will back at Stone Mountain Park again this year Click [here](#) for ARRL information on Field Day. Remember to mark your calendar for all three days, Friday to help setup, Saturday to finish setting up and start the festivities, and Sunday to finish the fun and pack up/clear out.

Save the Date: July 4th 48th Annual Peachtree Road Race. It takes more than 3,500 volunteers to support the the race and its 60,000 runners. They need Ham radio operators. Click [here](#) to read more about the race.

If you're not signed up to receive messages through the Alford Memorial Radio Club Yahoo Group, you should click [here](#) to stay informed and post your response. Our TOTR newsletter, Club meeting minutes, pictures, club financial reports, as well as some presentations will be available under "Files and Attachments". We'll see you at the club meeting, 73, *Mike Smith*

AMRC May Meeting Program

Thursday, May, 11, 2017, at 7:00 pm

Raspberry Pi Applications in Your HAM Shack

by Jim Reed N4BFR
(President of the Atlanta Radio Club)

The Alford Memorial Radio Club 76 Repeater is located on top of Stone Mountain, approximately 110 ft. up the TV transmission tower. Echolink is sometimes available on this repeater.

In February of 2015 the old Micor 145 and 444 repeaters and the cabinets associated with that equipment were replaced with brand new Kenwood commercial grade repeater equipment .

Located at Exchange Park, up and running beautifully,

Up and Running at Exchange Park.

Joe Walsh WB6ACU FAMOUS HAM OF THE MONTH

Joe Walsh born in 1947, is an American singer-songwriter, composer, multi-instrumentalist and record producer. He has been a member of 5 bands, and most well known as a guitarist with the Eagles. He is in the Rocking Roll Hall of Fame and in 2011, Rolling Stone listed him as number 54 out of 100 of the Greatest Guitarists of All Time. He co-produced the guitar solos in Hotel California. He even had a solo career. He acted in the role of a prisoner in the movie The Blues Brothers.

Known as the Clown Prince of Rock, he definitely has a great sense of humor, writing a song/album called Analog Man. His other nickname is Average Joe, which must be sarcasm, as he is anything but average, being praised by Tom Petty and Peter Townshend as one of the best guitarist to ever surface.

He has battled with addiction and has been a recovering addict since the early 1990s, after he woke up on a plane and had no recollection of boarding.

Joe has been married five times. Although he never married her, he opened for Stevie Nicks on tour, where it is said he became the human story behind her 1985 song *Has Anyone Ever Written Anything For You?* She has called him in interviews "the great love of my life."

Joe is known for his charitable ways and huge heart, even donating a guitar to the ARRL for an auction to raise charitable money among other numerous donations. He is a spokesman for amateur radio.

He is an Amateur Extra Class HAM radio operator. He has also been involved with his club's "Big Project," which brings amateur radio into schools. He has included Morse Code on two of his albums, Barnstorm (Register and Vote) and Songs for a Dying Planet (Register and Vote for Me).

The TOTR would like to thank Karl K4GZZ for the photo of Andrea with Joe and for the idea to make Joe May's Famous Ham of the Month. If you have a suggestion, email Gretchen at gretchelby@gmail.com.

AMRC TIP OF THE MONTH BY

Pat Deloe N4MPC

Mouse 2 Key

Pat N4MPC

Converting an old mouse to a CW key is not too difficult.

1. Open the mouse and locate the “hot” traces connecting the left and right switches to the encoder I.C. – cut the traces. There should be a common trace connecting the two switches to ground. Do Not CUT!
2. Remove two non-ground wires from the cord and solder each to the high side of the switches.
3. Remove connector from the end of cable and replace with matching connector for your rig – usually a ¼ inch phone plug.
4. Connect the mouse switch to the phone plug tip and the right side switch to plug ring. Enjoy!

History of the Armed Forces Day (AFD)

Many Americans celebrate Armed Forces Day yearly on the third Saturday of May to pay tribute to the men and women who serve the United States of America in the armed forces. Those in the Army, Navy, Marines, Air force, Coast Guard, and National Guard and Reserve units are celebrated.

On August 31, 1949, Louis Johnson, the US Secretary of Defense announced the creation of Armed Forces Day to replace days that were separately created for different branches of service. The Marine Corp still has their own Marine Corp Day but recognizes and celebrates AFD as well.

The first AFD was celebrated on Saturday, May 20, 1950. The theme for that day was "Teamed for Defense." The day was designed to expand public knowledge of what type of job was performed and the role of the military in civilian life. It was also a day to show civilians "state of the art" equipment used by the military.

ARMY
NAVY
AIR FORCE
MARINE CORPS

To Honor All the Services
ARMED FORCES DAY

TEAMED for defense!

ARMED FORCES DAY SATURDAY, MAY 20

SIERRA PACIFIC POWER COMPANY

Saturday, May 20, is our country's first Armed Forces Day! Our first opportunity to honor all of America's Armed Forces! We salute the gallant men and women teamed for our defense! All of us should become better informed about the Services in which they serve. Do you know, for example, that the Marine Corps is a Service within the Department of Navy? Or that the Air Force has a new medical service of its own called the U. S. Air Force Medical Service? There is much more we can learn about our Department of Defense—about its importance to every one of us, to our peace, our security, our freedom. So it is fitting that we observe May 20, not only by honoring our Services but also by learning more about them —on the Nation's first Armed Forces Day.

Like many American firms, we believe that business has a responsibility to contribute to the public welfare. This advertisement is therefore sponsored by:

Armed Forced Day Crossband Military/Amateur Radio Communications Test 2017

Armed Forced Day Crossband Military/Amateur Radio Communications Test is **Saturday May 13, 2017**. The US Army, Air Force, Navy, and Coast Guard will sponsor a traditional Military/Amateur Communications test on Saturday May 13, 2017 to mark the 66th annual Armed Forces Day. Armed Forces Day is May 20th, but the AFD Crossband Military-Amateur Radio Event will take place a week earlier in order to avoid scheduled conflicts with those attending Hamvention.

The annual celebration is a unique opportunity to test 2 way communications between radio amateurs and military stations. These tests give Amateur Radio operators and shortwave listeners (SWLs) a chance and a challenge to demonstrate individual technical skills and to receive recognition from the appropriate military radio station. QSL cards will be available on request for stations successfully contacting participating military stations.

The Armed Forces Day message will be transmitted via Military Standard radioteletype modes (MIL-STD 188-110A/B). Software is available to demodulate the military serial PSK waveform, and detailed instructions can be downloaded. Utilizing this mode with soundcard equipment can be challenging; review the instructions carefully.

A short practice transmission will be sent at 1930 and 2330 on May 6, 7, 10, and 12 on 13.506.5 MHz USB and 17.443.0 MHz USB.

Military FSK is Baudot at 850 Hz, 75 baud, low mark, and 2000 Hz center. Most RTTY programs can be set to decode this mode. To achieve low mark while receiving in USB, select reverse shift.

QSL cards are available for individuals that receive the Armed Forces Day test message. To receive a card, copy the printed text of the test message as received from the military station, and include it in your report. No attempt should be made to correct possible errors.

Stations copying Armed Forces Day messages transmitted from US Army and US Navy stations and requesting a QSL card, can complete the QSL report form online. Stations copying the Armed Forces Day message transmitted from US Air Force stations and seeking a QSL card should send a request to Armed Forces Day Celebration, Chief, Air Force MARS, 203 W. Losey St, Scott AFB, IL 62225.

Include a transcript of the received text, time observed, frequency observed, military station call sign, your full name and Amateur Radio call sign (if applicable), full mailing address (including ZIP code).

Automatic Link Establishment

Stations with Automatic Link Establishment (**ALE**) capability can contact a military station on specific half duplex crossband channels established for this purpose. ALE is a selective calling and linking method utilized by government, military, and amateur radio communications. Military stations will scan and receive certain amateur HFLINK ALE frequencies and transmit on the corresponding military ALE frequency. Military stations will also transmit ALE station identification (soundings) on each military frequency at 30- to 90-minute intervals. Amateur stations may scan military frequencies and monitor the soundings to build the LQA database or select the channel manually. Amateur stations will call military stations using ALE selective calling on one of the paired cross band channels.

Staying Alive– DeKalb ARES Members Train in CPR and Choking

Members of DeKalb ARES, on 05/6/2017, met to learn about Basic Life Support (BLS), based on the American Heart Association Guidelines. They also had training in Automatic External Defibrillators (AED) and Choking for infants, children, and adults. Those certified in BLS include Greg Mann KM4RKT, Barry Kanne W4TGA, Jonathan Goodson KM4UJP, James Popoff AJ4XI, Pat Deloe, N4MPC, Thomas Fuller KE4QCM, Michael Stevenson N2MFS, and Jim Penland N4RAR. Congrats to all who attended. The class was taught by Gretchen Mann, RN (W1MKW). DeKalb ARES meets on the first Saturday of every month at Dekalb Fire Rescue Headquarters.
