President's Notes September 2018

Greetings fellow ham radio enthusiasts and members of the Alford Memorial Radio Club! Please remember that it's up to you to promote our Hamfest on the air and to friends who maybe interested in our great hobby. Stone Mountain 2018 Hamfest We're moving forward with planning for a great Hamfest this year. We have several major vendors, flea-market and boneyard folks who have signed up.

The Club needs you! This is our only fundraiser for the club. A profitable Hamfest allows us to maintain our repeater system, pay our power bills, rent bills, and other commitments. With your help and commitment this one weekend a year, we can continue to function as one of Georgia's premier ham radio clubs and repeater systems. We are looking for volunteers to help with running the show for parking, flea-market, and vendors. We need help with testing as well. We already have at least a dozen people planning on taking the test at our Hamfest. Help us on Thursday with load in, marking off the boneyard, set up, Friday for completing setup, Saturday, or Sunday. We need help for all these times. Follow the below link to fill in the document with the dates and times and other information. This will help us plan our manpower needs to have a successful Hamfest. Click [Here](#) for Stone Mountain Hamfest Volunteer signup. Or cut and paste this link below https://docs.google.com/spreadsheets/d/1puFpxwJzAoM4ecba_buDpAuAbckR7GCFxGL7Yjv37xA/edit#gid=548602171.

We have lots of NICE prizes lined up again this year, tickets have been printed and flyers are being sent out. Buy your tickets at the meeting or online at <http://stonemountainhamfest.com/index.php/ticket-booth/>. Click her to buy [online](#).

We have the most listened to repeater in the Atlanta area. Maybe that's because we have the most members who like to talk and keep the repeater active. This is a great thing. As I travel throughout Ga. I listen to the repeaters which are near me. Most are quiet, very quiet. I'm sure that most repeaters are still being used to check in weekly nets, or to test a new rig or antenna, but chit chat can also be a good thing. When using the repeaters please remember to leave room for others who may be listening to chime in and be courteous.

It has been requested that our club should host an information table and VHF setup at Stone Mountain Lodge on Oct 20th during the Masonic Children's Home visit to Stone Mountain Park. This outreach opportunity will need some assistants from club members. We'll set up a 2 meter station and need hams to talk to kids on the radio. Maybe even demonstrate Morse code. The age range of the children will be from elementary school to college.

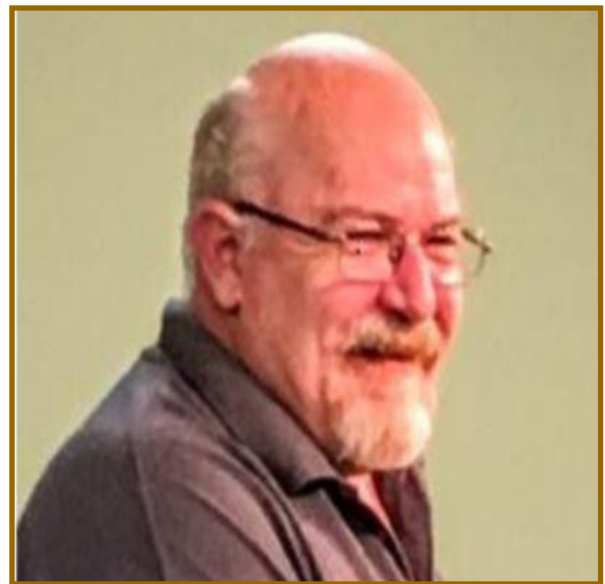

Sign up for the Alford Memorial Groups IO site send me an email requesting access, to make sure you don't miss any important news, information and discussions. You can view and download files, see the club calendar, post questions, and much more. There is a wealth of information and knowledge within the ranks of our club and we are not selfish about sharing it with and assisting others.

AMRC October Meeting 2018

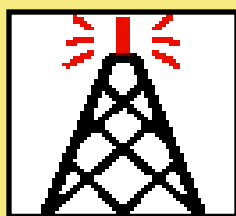

October Meeting 2018

Board Elections

AnnisTown Road Baptist Church

October, 11th, 2018, 7:00pm

The Alford Memorial Radio Club 76 Repeater is located on top of Stone Mountain, approximately 110 ft. up the TV transmission tower. Echolink is often available on this repeater.

Since February of 2015 Kenwood commercial grade repeater equipment has been located at Exchange Park.

Stone Mtn. to Host New DMR Repeater

The club has a new DMR repeater! We have requested a new UHF Frequency pair from SERA for the new repeater, and testing should begin when the club is assigned the new frequency pair. The Alford Memorial Radio Club is proud to be the first club in Georgia to sponsor a DMR repeater. We cordially invite all HAM radio operators to participate in this testing. Pictured right, Barry Kanne, W4TGA with Ken Bryant, K1DMR and the new Motorola DMR repeater.

Recipe of the Month

Fireball Whiskey Pumpkin Pie

THE INGREDIENTS YOU'LL NEED:

Frozen Pie Crusts – 2 (9” each or make your own)

PIE FILLING:

- Pure Pumpkin – 1 can, 30 oz.
- Evaporated Milk – 1 ½ cans, 18 oz.
- Eggs – 4
- Sugar – 1 ½ cups
- Salt – 1 teaspoon
- Ground Ginger – 1 teaspoon
- Ground Cloves – ½ teaspoon

Fireball Cinnamon Whiskey – 6 oz.

FOR SERVING

Whipped Cream

DIRECTIONS:

“AND IT’S REAL EASY TO DO!”

GETTING READY

1. Bring grill temperature up to 400 degrees Fahrenheit.

CRUSTS:

2. Follow directions on package of frozen pie crusts.
3. Using a fork, poke small holes all around pie crust.
4. Place pie crusts on grill opposite hot coals for 15-20 minutes. Cover grill.
5. Be sure to follow cooking times on the package of your frozen pie crusts.
6. Remove crusts from grill and reduce heat to 325 degrees Fahrenheit.

PIE FILLING:

7. Crack eggs and put in a mixing bowl.
8. Whisk and combine sugar, salt, ground ginger, ground cloves, pure pumpkin, evaporated milk, and cinnamon whiskey.
9. Thoroughly mix ingredients.
10. Pour mixture to the top of each pie crust.

Fireball Whiskey Pumpkin Pie.

MAKING

11. Grill temperature should be 325 degrees Fahrenheit.
12. Place pies on grill opposite hot coals.
13. Cover grill and cook for 25-30 minutes.
14. After 25-30 minutes, remove cover and rotate pies a half turn for even cooking.
15. Cover grill and cook for another 20-25 minutes.
16. Remove cover and check pies for doneness. Place a tooth pick into center of each pie and remove. If they come out clean, pies are done. If the pie sticks to toothpick they are not done. Continue cooking until you get a clean toothpick. If you don't have a toothpick, use your Old Hickory knife to check.

FINALIZING

17. Set pies on cooling rack to cool down.
18. Cut pies for serving.

SERVING

19. Top with whipped cream.
20. Sit back, relax, and enjoy!

Tip of the Month

Pat DeLoe

N4MPC

Painters Tape is a wonderful tape. It is easily written on, and I have been using it to secure my coax and cables. When removed, it has no sticky residue like other tapes leave. Be sure to add painter's tape to your shack materials.

Stone Mountain VE Team Gets Thank You. Testing with St Mtn Fosters Connection and Hope.

Good Morning Mike,

I am sending you this email hoping that you will positively recognize your VE team for their help with a student at my school who is trying to get his license. This student has been preparing for the license exam on his own, for the most part. As part of his preparation, he searched for locations that offered the test on a date when his mother could take him to the site. He happened upon the ARRL test locator site and saw that your club had a session last Saturday. I was happy that he chose this place since this is where I took my first license exam.

On his behalf, I contacted Steve G to let him know that this student would like to take his test with the AMRC team. Steve shared this info with Frank KV4SP. I also asked if I could be there for the testing to read the test to this student who has issues with dyslexia. Frank welcomed me to do this and invited me to join his VE team for breakfast, which I did.

What a great group of hams were there to give this test to this one student: Frank, Steve, Greg and Sharon Foster, and Russell Prevost. Breakfast offered a chance to chat with these folks and share some laughs. Steve met us at the test site and was actually the first one to meet and welcome this student and his mother there. Such friendly greetings is so reassuring to folks starting out in this hobby, as I know personally.

I read the test to the student from start to finish twice while the team patiently waited. Then we stepped outside as they graded it. As I suspected from the answers I saw him darken on the second time through the test, the results were not what the student, nor any of us, had wanted. He did not pass. None the less, the team was gracious and reassuring to the student and his mother. 'Next time,' they offered. Though I'm sure the student was disheartened at the result, I don't think he was discouraged.

With the exception of Steve, members of the team each had to drive a pretty long way to be there to administer this test to this one student. There was not one complaint or comment sighed about this. The attitude the whole time was positive, welcoming, and encouraging – a totally professional team of amateurs. They represented your club and the hobby well.

I'm glad I had the opportunity to meet and work with them.

73,

Martha

US Amateur Radio Bands

US AMATEUR POWER LIMITS

FCC 97.313 An amateur station must use the minimum transmitter power necessary to carry out the desired communications. (b) No station may transmit with a transmitter power exceeding 1.5 kW PEP.

On March 28, 2017, the Federal Communications Commission adopted rules that will allow Amateur Radio access to 472-479 kHz (630 meters) and to 135.7-137.8 kHz (2,200 meters). However, amateurs cannot use these frequencies until 30 days after the Report and Order is published in the Federal Register and the final procedures for registering stations with the Utilities Telecom Council (UTC) have been approved and announced. At the time this chart was created, the Report and Order had not been published and the UTC online registration site is not yet available. Follow ARRL for further information. New charts will be published at www.arrl.org/graphical-frequency-allocations when the bands are fully available for use.

Effective Date for
2,200 and 630 Meters
to be announced
